

CHLOROPRENE GLOVES

Excellent durability with exceptional comfort, strength and protection

Synthetic polychloroprene gloves provide a comparable softness as natural rubber latex but without the risk of protein allergy. This eliminates the risk of Type I allergy. With its unique formulation and glove mold design, this glove provides additional comfort during use over an extended period of time without hand fatigue.

PRODUCT FEATURES

Provides tactile and sensitivity of latex gloves without risk of Type I skin allergy

Strong, flexible and highly durable due to the nature of Chloroprene properties

Chloroprene provides exceptional resistance towards alcohol and oil

Provides exceptional strength and protection

CHLOROPRENE EXAMINATION GLOVES

FUNCTIONAL BENEFITS

- Prevention of Type I latex allergy
- Softer than nitrile examination gloves, comfortable to wear for a longer period of time
- Textured finger for better grip
- Tested for protection against chemical permeation

QUALITY STANDARD

- Conforms to ASTM D6977
- Manufactured under ISO 13485:2016 Quality Management System

MATERIAL

Chloroprene

LENGTH (mm)

Min. 240

PALM WIDTH (mm)

XS = 76 ± 3

S = 84 ± 3

M = 94 ± 3

L = 105 ± 3

XL = 113 ± 3

GLOVE SIZE

XS, S, M, L, XL

THICKNESS (mm)

Finger: 0.10 ± 0.02

Palm: 0.07 ± 0.02

DESIGN & FEATURES

Ambidextrous, finger textured, beaded cuff

COLOUR

Green

SHELF-LIFE

3 years from the date of manufacturing

Better chemical resistance compared to nitrile gloves

Applications: General Surgery | Examination | Chemical Processing | Machining | Automotive | Janitorial | Petrochemical | General Industry | Maintenance
