

TOP GLOVE GETS US NOD TO RESUME EXPORTS

10 September 2021 / 12:09

KUALA LUMPUR: Top Glove Corporation Bhd has received the go-ahead from the US Government allowed to resume exporting and selling gloves to the US.

In a statement on Friday, it said Top Glove Malaysia is clear and allowed to resume exporting and selling gloves to the US, following modification of the finding by US Customs and Border Protection (CBP) effective Friday.

In its statement at <https://public-inspection.federalregister.gov/2021-19535.pdf>, CBP affirmed that disposable gloves made by Top Glove in Malaysia would be admissible at all US ports of entry as of Friday.

“Top Glove wishes to express its utmost appreciation to CBP for its responsiveness in modification of the finding. Top Glove also wishes to thank the Malaysian Government and the company’s valued stakeholders for their support and understanding in this matter,” it said.

Top Glove said it remains committed to the health, safety and well being of its people.

“The company will continue to work hard and smart towards becoming an industry leader in this area and meeting the growing expectations of its stakeholders,” it said.
